

Week 1: Introduction to Technology & Internet

Instructor Guide - 90 Minutes

Before Class Checklist ✓

- [] Open browser to google.com (have it ready on projector)
- [] Write on board: "What technology did you use today?"
- [] Print Worksheet 1A (Internet Vocabulary Match) - one per student
- [] Test internet connection
- [] **If internet fails:** Use smartphone hotspot OR do vocabulary matching activity first

Learning Objectives

By the end of this session, learners will be able to:

1. Define "technology" and identify examples in everyday life
2. Explain in simple terms what the Internet is and how it works
3. Use a web browser to perform a basic online search
4. Recognize safe vs. unsafe online practices

MINUTE-BY-MINUTE LESSON FLOW

Opening (0-10 minutes)

 **Goal:** Build comfort, activate prior knowledge

What You Do:

1. **Icebreaker** (5 min): Point to board question "What technology did you use today?"

2. **Record answers** on board as students share (accept ALL answers: pencil, shoes, phone, TV)
3. **Key phrase to use:** *"Technology is any tool that makes life easier or solves a problem"*
4. **Transition:** "Today we'll explore how the internet affects our daily lives"

 Instructor Notes:

- Keep tone encouraging, avoid jargon
- If someone says "I don't use technology," gently point out examples (microwave, car, etc.)

What is Technology? (10-25 minutes)

 **Goal:** Learners understand technology is broader than just computers

What You Do:

1. **Brainstorm** (5 min): "List technologies you used today"
 - a. Write responses on board
2. **Categorize** (10 min): Group items into categories
 - a. Communication (phone, email)
 - b. Transportation (car, bus)
 - c. Learning (books, TV)
 - d. Entertainment (games, music)

Say This: *"See? A microwave is technology too! You already use lots of technology."*

What is the Internet? (25-45 minutes)

 **Goal:** Learners grasp Internet as network connecting devices

What You Do:

1. **Simple Explanation** (5 min):

- a. **Say This:** *"Think of the internet like roads connecting cities. The roads are cables, the cities are computers, and information travels like cars between them at high speeds."*

2. **Vocabulary Activity** (10 min):

- a. **Distribute:** Worksheet 1A
- b. Students work in pairs
- c. **Walk around and help**

3. **Review Answers** (5 min):

- a. 1-B, 2-D, 3-A, 4-C
- b. **Say This:** *"You don't need to memorize these words - just get comfortable hearing them!"*

 Magic Phrases When Students Feel Lost:

- *"That's totally normal - let's try it together"*
- *"Technology is just a fancy word for 'tool that helps you'"*
- *"Everyone learns at their own pace, and that's perfectly fine"*

Internet Practice & Safety (45-80 minutes)

 **Goal:** Students practice navigation and learn safety

Live Demo (10 min):

What You Do:

1. Open Chrome/Firefox (project on screen)
2. Type:
3. Use Google search: "What is the capital of France?"
4. Show how to click links and return to results

Say This: *"I'm going slowly so everyone can see each step"*

Guided Practice (15 min):

What Students Do: Try searches on their devices

- **Suggested search:** "What's the weather today in Roseburg?"
- **Your job:** Walk around, help individual students

Quick Troubleshooting:

- **Internet is slow:** Have students work in pairs, reduce demo time
- **Student feels embarrassed:** Share that even tech experts Google "how to..." constantly
- **Someone finishes early:** Ask them to help a neighbor

Safety Scenarios (10 min):

What You Do: Show these scenarios and ask "Safe or Unsafe? Why?"

1. Pop-up says "You won a free iPhone - click here!"
2. Website asks for your Social Security number
3. Article says "The moon is made of cheese"
4. Library website with .gov ending

What Students Do: Group vote and discuss

Expected Answers: 1-Unsafe, 2-Unsafe, 3-Unreliable, 4-Safe

Wrap-Up (80-90 minutes)

Goal: Reinforce learning, check understanding

What You Do:

1. **Discussion:** "What's one new thing you learned today?"
2. **Call on 2-3 volunteers** (don't force participation)
3. **Preview next week:** "Next time: email - how to set it up and stay safe"

Optional Exit Ticket: "Today I learned ____ / I still have questions about ____"

IF THINGS GO WRONG

Internet Completely Fails:

- Do vocabulary matching first
- Practice writing email addresses on paper
- Use smartphones if computers are down
- Focus on discussion activities

Running Behind Schedule:

- Skip "bonus" parts of vocabulary activity
- Do demos faster, give more practice time
- Have students work in pairs to help each other

Ahead of Schedule:

- Ask "What questions do you have about what we just learned?"
- Let students practice more searching
- Share extra real-life examples of internet use

Materials Needed

-  Whiteboard + markers
-  Projector/large monitor
-  Worksheet 1A (provided) - one per student
-  Computer with internet for each student (or pairs)

Assessment

How to know students "got it":

- Can complete a Google search
- Can identify at least one unsafe online practice
- Participate in technology brainstorming

Homework for Students

Practice: Go to [google.com](https://www.google.com) and search for something you're curious about. Try at home, library, or ask a family member to help.
